LED Grow Lights

Lijiacheng LED growing lighting is a high-performance, full-cycle top-lighting solution for commercial horticulture cultivation with the power to scale from vegetative growth to higher light intensities in bloom.

Lijiacheng growing lighting can illuminate all types of vertical racks and grow tables with precise and uniform light on the plant canopy. The two PPF output levels and built-in dimming capabilities enable the exact and dynamic PPFD control over each of the plant growing stages. With the ability to maximize use of your growing space, Lijiacheng growing lighting has various hardware options for easy mounting to all types of racks and tables with no drilling or other modifications to the rack system.
